PROFILE

Full-stack developer specializing in Django and React, with applied machine-learning training from the Stanford / DeepLearning.AI ML Specialization. I build production SaaS platforms end to end — from PostgreSQL data models and REST APIs to polished, fully internationalized React frontends. Final-year Computer Engineering student at Amirkabir University of Technology (Tehran Polytechnic), graduating summer 2026. An earlier degree in Urban Planning gives me a user-centered, systems-level approach to product design.

CORE SKILLS

Languages & Frameworks	Python, Django, Django REST Framework, JavaScript (ES6+), React.js
Frontend	React.js, HTML5, CSS3, Tailwind CSS, Bootstrap — responsive & RTL interfaces
AI & Data	TensorFlow, PyTorch, NumPy, Pandas — Machine Learning, Deep Learning
Databases	PostgreSQL, MySQL, SQLite, SQL
DevOps & Tools	Docker, Kubernetes, Git / GitHub, Linux, n8n, CI/CD (Netlify, Render), Jira
Also familiar with	PHP, Java, C, Figma / UI-UX design, GIS

EXPERIENCE

Front-End Developer

Aug 2023 – Jun 2024

Sharifi Neya Travel Service · Remote (Kabul, Afghanistan) · Part-time

- Translated design concepts into responsive, production-ready interfaces with HTML5, CSS3, and JavaScript, shipping customer-facing booking pages used by the company's travel clients.
- Improved usability and visual consistency across the public site, and laid the front-end groundwork later extended into the full SharifiNeya booking platform (see Projects).
- Owned the front-end development lifecycle end to end — feature build, code review, and version control with Git / GitHub, collaborating with the team on releases.

FEATURED PROJECTS

[SharifiNeya — Travel & Booking Management Platform](#)

Flagship

Stack: *Django · React · PostgreSQL · Tailwind CSS*

- Architected a full-stack platform with a multi-portal architecture serving four distinct user types — Public, B2C customers, B2B travel agents, and Admin — each with role-specific access and workflows.
- Engineered the financial core: a digital wallet, a double-entry accounting ledger, a flight-booking engine, and a dynamic markup-rule system for per-agent pricing.
- Delivered full internationalization across three languages (English, Dari, Pashto) with complete right-to-left (RTL) layout support. Built for Sharifi Neya Travel Service.

Professional Online Broker — Real-Time Trading Platform

Stack: *Django · React · Docker*

- Built a full-stack, real-time trading platform with a high-performance, responsive React interface for live market interaction.
- Containerized and deployed the system as Docker microservices, structured for horizontal scalability and reliable independent deployment.

Premium SaaS Booking Engine — Scheduling Ecosystem

Stack: *React · WordPress · PHP · n8n · Vapi AI*

- Developed a timezone-aware scheduling ecosystem driven by a dynamic React “Command Center” dashboard.
- Implemented custom PHP REST API interceptors and a fully automated n8n communication pipeline for notifications and follow-ups.

- Integrated Vapi AI voice agents to enable hands-free, conversational booking — bridging telephony and the scheduling backend.

EDUCATION

B.Sc., Computer Engineering Feb 2022 – Jun 2026

Amirkabir University of Technology (Tehran Polytechnic)

Focus: Web Development & UI/UX · Mobile Development (Kotlin) · Urban Planning & AI Research · GIS & Python.

B.A., Urban Planning & Design (Incomplete) 2018 – 2021

Kabul Polytechnic University · SAPC Member

SELECTED CERTIFICATIONS

- **Machine Learning Specialization** — DeepLearning.AI / Stanford University (2025): Supervised ML, Advanced Learning Algorithms, Unsupervised Learning, Recommenders & Reinforcement Learning.
- **Python for Everybody Specialization** — University of Michigan (2025).
- **Generative AI & LLMs** (5-course suite) — Google. · **Claude Code 101** — Anthropic (2026).
- **SQL (Advanced) & Software Engineer Intern** — HackerRank (2025).

LANGUAGES

English — Professional working proficiency (IELTS Academic 6.5).

Persian / Dari — Native.

Pashto — Working knowledge (delivered full Pashto product localization).
